

Uday Vatti | Design Engineer

San Francisco, CA | [Portfolio](#) | [LinkedIn](#) | 480-233-2224 | vuday23@gmail.com

Summary / Objective

Design Engineer with 8+ years of experience building high-performance web experiences, design systems, and scalable frontend platforms. Currently leading development across Labelbox's web properties, partnering with design, product, and marketing teams to deliver performant, accessible, and maintainable user experiences. Experienced in Next.js, React, TypeScript, CMS architecture, developer tooling, and AI-powered workflows.

Core Competencies

- **Design Engineering & Frontend:** Next.js, React, TypeScript, Tailwind CSS, Storybook, Design Systems, Accessibility (WCAG), Performance Optimization, SEO, Figma-to-Code
 - **Web Platforms & Content Systems:** Headless CMS (Sanity, Contentful), Content Architecture, Marketing Websites, Component Libraries, Developer Experience
 - **Engineering Productivity & AI Tooling:** Claude, Cursor, AI-Assisted Development, Engineering Automation, Documentation Workflows, Custom Agents & Skills
 - **Platform Engineering:** Node.js, REST & RPC APIs, Application Architecture, Backend Services, Authentication Systems
 - **Data Visualization & Analytics:** Plotly, Chart.js, Analytics Dashboards, Evaluation Platforms, Data Modeling
 - **Cloud Infrastructure:** GCS, BigQuery, Cloud Run, Vercel, Supabase (Postgres + RLS)
 - **Auth & Security:** RBAC Systems, JWT, OAuth, npm SDK Authoring, Audit Logging
 - **Tooling & Operations:** GitHub Actions, CI/CD, Agile Development, Release Automation, Monitoring & Observability
-

Professional Experience

Sr. Web Developer & Designer | **Labelbox**, San Francisco, CA | *Nov 2021 – Present*

- **Web Platform & Design Engineering:** Own engineering and technical strategy for Labelbox's public web properties, including [labelbox.com](#), [alignerr.com](#), and

prism.labelbox.com, partnering closely with design, marketing, and product teams to deliver high-quality user experiences.

- **Design Systems & Frontend Architecture:** Built and scaled a shared component library and Storybook-driven design system, improving consistency across products and enabling faster development workflows.
- **Internal Tools & Production Platforms:** Designed and shipped internal platforms spanning AI evaluation, authentication, security tooling, and data management, owning the full lifecycle from architecture and implementation to deployment and ongoing evolution.
- **Cloud Infrastructure & Security Systems:** Modernized data and authentication infrastructure using GCS, Cloud Run, and BigQuery, including a standardized ingestion architecture and centralized authentication SDK adopted across internal applications.
- **Engineering Productivity & AI Tooling:** Built AI-powered development workflows that codify engineering standards across documentation, UI implementation, accessibility, and maintainability. Created reusable agents and skills to enforce design system adoption, architectural conventions, and code quality.
- **CMS Architecture & Content Workflows:** Architected CMS-driven content workflows that empower non-technical teams to manage and publish content independently while maintaining performance, accessibility, and SEO standards.
- **Data Visualization & Evaluation Interfaces:** Built AI evaluation dashboards with rubric scoring, QA workflows, model comparison, cost analysis, real-time pipelines, and deep-link sharing, plus reusable Plotly and Chart.js components.

Full Stack Developer | **Triple Crown Products** | *July 2017 – Oct 2021*

- **E-commerce Transformation:** Led the modernization of e-commerce platforms, migrating legacy systems to React and SASS.
- **Performance Optimization:** Increased website performance by 40% through aggressive caching strategies and asset optimization.
- **Organic Growth:** Engineered SEO enhancements that drove a 60% increase in traffic.
- **CMS Innovation:** Built a custom CMS that empowered marketing teams with scheduled content releases and feature flag deployments.

Selected Project

Them Design Studios:

- Built a modern web presence for a creative agency, delivering a responsive portfolio site that increased inquiries by 200%.
- Technologies used: React, Firebase, Contentful, GSAP, Styled Components, Tailwindcss
